

Hazardous Materials Transportation Workshops

Local Interest, National Appeal

FREE!

OVERVIEW

The **Hazardous Materials Regulations** (HMR; 49 CFR Parts 171-180) specify requirements for the safe and secure transportation of **hazardous materials** in commerce by rail car, aircraft, vessel, and motor vehicle. These comprehensive **regulations** govern transportation-related activities by offerors (e.g., shippers, brokers, forwarding agents, freight forwarders, and warehousemen); carriers (e.g., common, contract, and private); packaging manufacturers, reconditioners, testers, and retesters; and independent inspection agencies.

The HMR apply to each person who performs, or causes to be performed, functions related to the transportation of **hazardous materials** such as determination of, and compliance with, basic conditions for **offering**; filling packages; marking and labeling packages; preparing shipping papers; handling, loading, securing and segregating packages within a transport vehicle, freight container or cargo hold; and **transporting hazardous materials**.

This one-day workshop provides an overview of **how to use the HMR** and a summary of many of the requirements found in the HMR which can affect transportation safety to include: **Training Requirements, Packaging, Hazard Communications, and Security**.

WHO SHOULD ATTEND

Anyone who offers or transports hazardous materials in commerce or has a desire to learn more about USDOT's Hazardous Materials Regulations.
